

GSK is a science-led global healthcare company that research and develop a broad range of innovative products in three primary areas of Pharmaceuticals, Vaccines and Consumer Healthcare, with a significant global presence in more than 150 countries. It's searching for Madrid-Spain headquarters:

Director Medical Affairs Immunology & Rare Diseases Spain GSK (MADRID)

He/she will be ultimately responsible for all medical & scientific matters regarding the product/compound/disease area(s) under his/her responsibility, including adequate Medical Governance and compliance with Pharmacovigilance & Risk Management requirements.

The incumbent would be responsible for designing, planning, and leading/co-ordinating Therapy Area activities (within his/her team, with IRDBU/RDU Specialty Franchise and with the Spanish IRDBU Commercial organization) so as to ensure that a consolidated opinion (medical & commercial) is voiced to IRDBU/RDU/Specialty Franchise and externally. Accountable for the Scientific engagement activities developed in her/his responsibility area.

Main functions:

- Full oversight of the Local & European strategic needs of the Medical Dept. for the area under his/her responsibility, directly and/or through his/her team, both from the Clinical and Commercial perspective.
- Accountable for Medical Dept. contribution for all programmes under his/her responsibility. Will be the Medical Dept. representative in Medical IRDBU. This involves contributing to the strategic plans and campaigns originated in the RDU and Specialty Franchise, and ensuring appropriate compliance with relevant internal and external procedures, regulations and codes.
- Active member of the pre-launch local business/project teams. In such role, will provide best medical input to other stakeholders (eg. Regulatory, Commercial, BD, etc.).
- Implementation and conduct ISSs.
- Design, conduct and report of all compound-related scientific studies (e.g. epidemiological studies), as agreed with RDU and the Specialty Franchise and within the approved study budget. May act as a Central Medical Monitor for specific European programmes/projects.
- Medical responsibility on local studies/ISS.
- Leadership role, development of team members.
- Support/Advice to the Regulatory Affairs Dept for new product launches.
- Assist Regulatory Dept in interactions with Local Health Authority (including Autonomous Communities).
- Interactions with KOLs, Scientific Societies, NGO and other external bodies/experts, as appropriate. Conduct peer to peer robust scientific dialogue with external experts.
- Ensure the responses in a timely and accurate manner to unsolicited request for on or off-label information or safety concerns from HCPs.

Required Profile:

- Degree in Medicine.
- Previous experience in Clinical Development and Medical Affairs, preferably in more than one Therapy Area
- Previous clinical experience in immunology, internal medicine, microbiology or similar hospital therapeutics areas is desirable.
- Experience managing working teams.
- Deep knowledge of national and regional health system stakeholders.
- Knowledge and experience in epidemiology and Clinical Investigation.
- Pharmacoeconomics knowledge.
- High scientific/technical English level
